

**Technical Work Group
March 2, 2000
Phoenix, Arizona**

DRAFT

Presiding: Rick Johnson, GCT (Chairperson)

Committee Members Present:

Clifford Barrett, CREDA
Robert Begay, Navajo Nation
Andres Cheama, Pueblo of Zuni
Kerry Christensen, Hualapai Tribe
Dave Cohen, Trout Unlimited
Wayne Cook, UCRC
Wm. Davis, EcoPlan Assoc/CREDA
Kurt Dongoske, The Hopi Tribe
Brenda Drye, So. Paiute Consortium
Christopher Harris, ADWR
Norm Henderson, NPS/GCNRA
Amy Heuslein, BIA

Rick Johnson, GCT
Matt Kaplinski, GCRG
Robert King, UDWR
Phillip Lehr, Colo. River Comm./Nevada
Don Metz, FWS
S. Clayton Palmer, WAPA
Bill Persons, AGFD
Mindy Schlimgen-Wilson, Am. Rivers
Randy Seaholm, CWCB
Robert Winfree, NPS/GCNP
Fred Worthley, CFBC

Committee Members Absent:

Nancy Hornewer, USGS
John Shields, WY State Engr. Office

Alternates Present:

Bert Duet
Dennis Kubly
Wayne Cook

Alternate for:

Nancy Hornewer, USGS
Randall Peterson, USBR
John Shields, WY State Engr. Office

Other Interested Persons Present:

Timothy Begay, Navajo Nation
Gary Burton, WAPA
Shane Collins, WAPA
Nancy Coulam, USBR
Barry Gold, GCMRC

Barry Gold, GCMRC
Pam Hyde, Glen Canyon Institute
Jerome Montague, NPS
Rob Smith, Sierra Club

Recorder: Linda Whetton, USBR

Meeting Opening and Administrative Items

3/2/00: Convened: 9:30 a.m.

Adjourned: 4:30 p.m.

Welcome and Introductions

The Chairperson welcomed the TWG members, alternates, and guests. All introduced themselves. The Chairperson determined there was a quorum established.

Attendance: Attendance Sheets were distributed (Attachment 1 - List of Attendees)

Motion: Approve January 19 & 21, 2000 meeting minutes. Without objection, the minutes were approved as written.

Motion: The TWG Operating Procedures be modified to allow members (or officially designated alternates if the member cannot attend) to be reimbursed for air fare or personal vehicle mileage, and hotel costs to attend TWG meetings. TWG members or alternates must have an approved travel authorization prior to travel to receive reimbursement.

Rick said the reason for the motion was that there was some confusion as to what kind of travel reimbursement was available to TWG members as opposed to AMWG members. Some TWG members were utilizing the process and others weren't so this was an attempt to clarify the policy. There was a brief discussion on how this would impact the program financially and whether all members could claim reimbursement. It was decided more information was needed before the Operating Procedures could be changed.

ACTION: Discuss at a future meeting.

Action Items from last meeting. Rick referred the members to page 11 of the January 19 + 21, 2000 Draft Minutes. He provided updates on the items:

1. The KAWG has put out a series of clarification questions to the panel and they hope to get those back by late March and have those available for the April AMWG meeting.
2. The Ad hoc group got together and decided that this needs to be delayed. They want to have the MO's fairly well completed before bringing to the AMWG.
3. Completed.
4. Completed.
5. On tomorrow's agenda for discussion.

Management Objectives. Mary Orton said that at the last meeting of the Ad Hoc Committee on

Strategic Planning, they came up against the realization that there was no way they would be able to complete the MOs before the AMWG meeting. The comments will be recorded and the ad hoc committee will meet and consider every one of the comments. She referred the members to the list (Attachment 2) and informed them they would have one more time to provide comments before the document goes to the AMWG.

The footnotes at the bottom of the document are tied to the old MOs that went with that particular goal. For example, (on page 2), the code ABRMO1" refers back to the June 10, 1998 document which was the last approved document of the MOs. The ABR" refers to Biological Resources. It is the first MO in that section. If anyone needs to see that document, contact Mary. At end of chart (pgs. 30-32), there is a list of information needs, management actions, and notes. This is not a comprehensive list but was created as the committee went along. They provide a little bit more information on what that MO means. The committee was not able to put a number with every target or current level but they indicated the method they think should be used to get that number. It's usually one of three things: 1) obtained from literature, 2) information need - research needs to be done, or 3) decision process - target would be developed within the range of operational flexibility of the dam, taking into account the range in which the target resources thrive and the range of natural variability. They looked at those three things and tried to determine the best target level for that particular element, attribute, and resource. If there is a number in the target level, then that number will be validated through the monitoring program over the years. In addition, the Definitions were also reviewed (Attachment 3).

Mary said that the specific things the ad hoc committee would like to hear from the members are the first three items on the cover memo (a,b,c). If members have additional comments, they can send them to her (maryorton@aol.com) or Randy Peterson (rpeterson@uc.usbr.gov).

Mary reviewed the handout on "[Robert's Rules of Order](#)" and informed members that she would solicit comments from the members first and then the public. Staff from Reclamation and GCMRC may answer questions at any time.

Discussion of MOs B> Flip Charts (Attachment 4).

ACTION: Have someone make a presentation on the Recovery Program at the next TWG meeting (requested by Matt Kaplinski).

ACTION: Send MO BIN issues to everyone - Mary Orton

Pre-information on. Barry Gold passed out copies of a report entitled, AAn Outline and Schedule for the Development of a Science Plan for WY 2000 Steady Flows,@ (Attachment 5) prepared by Barbara Ralston and Mike Yard. This is an update on the science plan.

GCD Technical Work Group
Minutes of March 2-3, 2000 Meeting
Page 4

Adjourned: 4:30 p.m.

**Technical Work Group
March 2-3, 2000
Phoenix, Arizona**

Presiding: Rick Johnson, GCT (Chairperson)

Committee Members Present:

Presiding: Rick Johnson, GCT (Chairperson)

3/3/00: Convened: 8:00 a.m.

Adjourned: 12:30 p.m.

Welcome and Introductions

The Chairperson welcomed the TWG members, alternates, and guests. All introduced themselves. The Chairperson determined there was a quorum established.

Attendance: Attendance Sheets were distributed (Attachment 1 - List of Attendees)

Rick suggested that since Mary has to leave early today that the agenda be modified to allow her to complete discussion on the MOs. Members concurred.

Continuation of MO-s Discussion: Mary reviewed the MOs with the members. Refer to Attachment 4.

ACTION: Re-draft language for MOs 47, 48, and 49 and turn into ad hoc group - Bill Persons.

Announcements:

1. Barry said that at the last TWG meeting, they had talked about the need to look at the Automatic Generation Control and one of the steps was to reinstall the gage at GCD. He said the gage was reinstalled on Feb. 29, 2000, and the data should be on the web today.
2. There will be an organizational meeting of the Native Fish Work Group beginning at 1:15 today.
3. The TWG members are invited to attend an open session of the Cultural Resources Protocol Review session on March 13-14 in Flagstaff at the GCMRC. The sessions are from 8:30 - 12:00 and the general public is also invited..
4. The dates for the Annual Operating Plan meetings are May 17, June 21, and August 16. They're scheduled to start at 9 a.m. at McCarran Airport.
5. Rick reminded the members of the AMWG meeting scheduled for April 4-5. The purpose was to bring the MOs to the AMWG. However, he doesn't feel we are ready to do that and asked if the

dates should be kept open and use as a TWG meeting to bring the next iteration of MOs or cancel altogether and schedule some other meeting for the next iteration.

ACTION: Rick will talk with Randy and discuss meeting date options.

Filling of Environmental Position on the AMP. Mindy said that TWG members should've received a copy of a letter from the president of American Rivers indicating that the Southwest Office was being closed as of June 30, 2000. They are actively looking for a replacement and have been working with the environmental community and have had a lot of discussions and there has been a lot of interest. If there is an AMWG meeting in April, they will be presenting information at that time. They will be submitting a name to the Secretary within a month or so. She hopes it will be a smooth transition by June 30. Contrary to popular beliefs, American Rivers has not vacated their seat on the AMWG or TWG and would like to be maintained on the roster and continue receiving information.

Fall River Trip - Rick said there has been one launch date that has been given to the TWG as an opportunity to launch in the fall. The date to launch is Sept. 2 and arrive at Diamond Creek on Sept. 9. There are two purposes being discussed for the river trip: 1) finalize the strategic plan or figure out how to move forward, and 2) have discussions about cultural resource values in the canyon. Rick questioned if the members were in agreement on the right purposes and if those dates work well with their schedules. Barry said he needs a firm commitment from members as there are number of things he needs to do to plan for the trip.

ACTION: Members will e-mail Barry by March 10, 2000 if they plan on going on the river trip.

Hydrology Update & LSSF - Tom Ryan reported that the snowpack in the Upper Colorado River Basin is now up to 83% of average (Attachment 6a) and (Attachment 6b). On January 1, 2000, it was only 43% of average. There have been storms moving into the central portions of the basin where the gradient that was very pronounced early in January and has become more homogenous. There has also been more snow in the Gunnison, San Rafael, Dolores, and those areas. Tom said the months of October, November, and December were extremely dry months with very little precipitation prompting issuance of the 52% of average forecast in January. In January the precipitation in the Colorado River Basin was about 130% and Tom anticipates that the figures for February will be pretty close to that as well. The current forecast is 5.8 maf, which is 75% of average (Attachment 6c). A decision will need to be made by the latter part of March on what is going to be done.

Due to a number of concerns raised by the TWG members, Barry felt it might be appropriate for him to give a 5-minute presentation on the science plan and then go back to the above discussion. He referred to the document he passed out yesterday (refer to Attachment 5). This is where they are in developing the science plan. When the Bureau called the GCMRC on Feb. 4, 2000, indicating they were thinking seriously about stopping the test, they sat down and created a process for developing a science plan.

That report is still in draft but due be finalized this month. Barbara Ralston has been talking to the various PIs that work in the system about study plans to test the hypotheses. The study plans are due back to her by COB today and Barry will consolidate them into an overall framework for testing and develop a budget to modify existing work to do additional research. The science plan won't be put together for at least another week and then it will be brought forward to the Bureau and WAPA with a cost number. A decision should be made shortly thereafter.

Tom said there is still a chance of a BHBF. Reclamation is planning on a low flow year but with hydrology changing, they're different under the two flow regimes. With a test release, the chance of a BHBF is about 7% which means you could get forced into a spill. Without the test, the chance is actually higher about 12%. The reason the percentages is that you are going to start aggressively moving water early under the test which lowers the probability of having a spill later.

TWG Ad Hoc Group Report. Rick reported the group (Randy Peterson, Barry Gold, Bill Persons, Clayton Palmer, and himself) looked at how TWG meetings have been scheduled around AMWG meetings. He directed the members to the three items listed on the agenda and said no conclusions have been made. They will continue to look at alternatives and hope to have something ready for the next TWG meeting.

Long-term Fish Monitoring Plan. Barry said the Long-term Fish Monitoring Work Group met with the NFWG on Feb. 8 and are developing a consolidated database, protocols for data sharing, and farming out different assignments to each other for analyzing the database. GCMRC resources are being utilized in terms of having their database developers focus on the native fish database and getting it ready to be analyzed. The target for getting the first set of analyses is June or July 2000.

Public Comment & Wrap UP.

Members commented on having TWG meetings before/after AMWG meetings as well as the frequency of meetings.

Debra Bills said that May 9-10, 2000 are the days scheduled for a joint Fish and Wildlife/BLM Section 7 workshop. It is designed specifically for people doing consultations and the workshop is only done every couple of years.

Rick said some people have indicated they would like a presentation on power economics. He asked Gary Burton and Cliff Barrett if something could be prepared for the next TWG meeting. Cliff said they did something similar for the Aspinall group and could do for a meeting in May.

Several members commented on the mailing package and felt it was very well organized and would like to see all meeting packages prepared in the same format.

Action Items:

1. Discussion of payment of travel expenses for TWG members/alternates at next meeting – Reclamation.
2. ~~Outline of Recovery Program Presentation at next TWG Meeting requested by Matt Kaplinski (deleted at TWG Meeting on 5/10/00)~~
3. Send MO BIN items to everyone – Mary Orton
4. Re-draft language for MO's 47, 48, and 49 and turn into ad hoc group – Bill Persons
5. Upcoming TWG & AMWG meetings – Randy Peterson
6. Power economics presentation – Cliff Barrett could do in May 2000.
7. Barry needs a firm commitment from TWG members going on the TWG River Trip (Sept. 2-9, 2000) by close of business **March 10, 2000.**

Adjourned: 12:30 p.m.

Next Meeting:

May 10 (9:30 – 4:00)

May 11 (8-noon)

Location:

Bureau of Indian Affairs Office
12th Floor, 400 N. 5th Street
Phoenix AZ
